Dual Language Development & Disorders: A Handbook on ...

The extant, albeit limited, evidence concerning dual language learners with language impairment indicates that such learners exhibit the same language-specific morpho-syntactic difficulties in each of their two languages as monolingual and, as well, that their language impairment is of the same magnitude as that exhibited by monolingual learners of the same languages.

DUAL LANGUAGE DEVELOPMENT - McGill University

Language disorders Aphasia (difficulty understanding or speaking parts of language due to a brain injury or how the brain works). Auditory processing disorder (difficulty understanding the meaning of the sounds that the ear sends to the brain) Learn more about language disorders external icon.

Language and Speech Disorders in Children | CDC

Language is treated as the primary focus of concern when responding to the needs of bilingual children with language impairment; however, cognitive, socio-cultural, and educational aspects of development are heavily emphasized as pivotal to the understanding of language impairment as well. This book comprises 8 chapters.

Fred Genesee, Johanne Paradis, and Martha B. Crago: Dual ...

Specialty, Neurology. Developmental language disorder (DLD) is identified when a child has problems with language development that continue into school age and beyond. The language problems have a significant impact on everyday social interactions or educational progress, and occur in the absence of autism spectrum disorder, intellectual disability or a known biomedical condition.
