The process of negotiation begins with the negotiators' opening moves and strategies and ends with some outcome. As they choose strategies, economic diplomats face a wider range of options than just cooperating or defecting. This chapter introduces a way to classify observed strategies that captures more of this range, while still simplifying.

SUMMARY. It is often said economics has become as important as security in international relations, yet we work with much less than full understanding of what goes on when government negotiators bargain over trade, finance, and the rules of international economic organizations. The process of economic negotiation shapes the world political economy, John S. Odell says, and this essential process can be understood and practiced better than it is now.

Some claims are specific to economic negotiations whereas others may apply more generally. Chapter 3 highlights what most clearly makes economic negotiations distinct from those confined to political-military issues. This book's primary audience is scholars interested in the world's political economy.
